Program Description and Goals

The Haumana 'O Pasifika Program is designed to encourage and enable research and career development opportunities for undergraduate students or recent graduates who are interested in studying health disparities affecting Pacific Islanders. Selected applicants will be paired with scientific mentors for a 10-week summer research internship. Haumana Scholars will attend weekly seminars designed to:

- 1) increase exposure to the breadth of Utah's research community;
- 2) enhance career development and networking opportunities; and
- 3) enhance the trainee's skills in scientific communication.
